Publish text message

▼ Overview

Amazon SNS lets you send SMS text messages to any phone number. [Learn more](#)

**Publish text messages**

You can use a topic to fan out messages to many SMS endpoints at once, or send a message directly to a single phone number.

Step 5:  
In Edit Screen  
Select Default message type to Transactional  
Account Spend Limit and other optional fields as required

Amazon SNS > Text messaging (SMS) > Edit text messaging preferences

## Edit text messaging preferences

**Details**

**Default message type**  
While promotional messages are non-critical, Amazon SNS sends transactional messages with a higher priority.

Select a default message type ▼

**Account spend limit - optional**  
The maximum amount to spend on SMS messages each month.

1 USD per month

The amount should be equal to or less than your SMS spending limit. [Learn more](#)

**Default sender ID - optional**  
A custom ID, such as your business brand, displayed as the sender on the receiving device. Support for sender IDs varies by country.

SOCION

Maximum 11 alphanumeric characters, including at least one letter and no spaces.

**Amazon S3 bucket name for usage reports - optional**  
The Amazon S3 bucket to receive daily SMS usage reports. The bucket policy must grant write access to Amazon SNS.

socion-sns

The name of a bucket must be 3 to 63 characters long, not containing uppercase letters, spaces or underscores (\_).

Step 6:  
Save the changes

Amazon SNS > Text messaging (SMS) > Edit text messaging preferences

## Edit text messaging preferences

**Details**
